BASIC LIFE
SUPPORT

BRAYDEN

1 Choose your Brayden
CPR manikin

2 Choose from our **iPAD**
Defibrillator range (see inside) ...

3 Choose your Boscaryl
emergency suction unit

Choose the perfect Basic Life Support solution for **YOUR** environment

BRAVDEN

Choose your manikins from our Brayden CPR training family.

1 MANIKINS

The **Award winning Brayden CPR** training manikin is both an innovative and effective way to teach quality CPR. Using animated LED lights under the manikin skin, effective CPR technique is visible if compression, depth and recoil is correct. The Brayden family also demonstrate effective ventilation with a realistic head tilt & chin lift, chest rise & fall and compatibility with oxygen masks.

The Brayden family cater for all: From our new Obi, the anatomically correct manikin for diverse communities to the Baby, being the first illuminating infant CPR manikin, the family come in a basic format through to our most comprehensive self-directed learning platforms.

WEATHER PROTECTION

HIGHEST IP66 RATING AED - HIGHLY WATER RESISTANT

iPAD SPR Trainer

HELP
SAVE LIVES

Choose from our **iPAD range of Fully & Semi Automatic** live and training defibrillators. We have a unit for every environment and paired with our iconic cabinets, your defibrillator will be stored safely and securely. Using advanced technology and innovative features, our iPAD AED's provide a vital role in saving someone's life. The NFK200 is our value priced unit, followed by the well-established SP1 and finishing the range is our new SPR with its industry leading IP66 rating. It is build for the outdoors and having dual adult & paediatric capability, it is the perfect device to help save lives.

3 EMERGENCY SUCTION UNIT

Finally, complete your BLS solution with your choice of the **Boscarol range of Medical Suction Units.**

Both the OB3000 and the OBMini are two of the lightest and most powerful units in their class, providing outstanding functionality and portability.

The Boscarol suction unit range ensures that the critical importance of pre-hospital emergency airway management is both timely and effective.

Not only are the units robust, but with a five-year warranty, easy-to-use functionality and variable suction, they cater for all patients and are a must-have in the BLS kit list.

QUALITY BLS SOLUTIONS
to suit your needs.
